

RETROFIT OVAL FILTER CARTRIDGES

Camfil now manufactures HemiPleat® and Dura-Pleat® replacement filter cartridges to fit all Oval industrial dust collectors. These filters use patented pleating technology that enables them to outlast and outperform cartridges fabricated with standard pleated filter media.

ADVANTAGES

- Low pressure drop
- Extended filter life
- High filtration efficiency
- Direct fit replacement
- Customized length available

Application: Suitable for many industrial processes like metal fabrication (welding, blasting, laser & plasma cutting, powder paint coating), food processing, pharmaceutical and chemical industry

Structure: Galvanised end caps and internal support

Gasket: Foam in place polyurethane or synthetic rubber

Sealant: Polyurethane

Temperature: 71° C for HemiPleat, 93° C for Dura-Pleat

Media Type	Part Number	Description	Filter Area	DIN EN60335-2-69 (Dust Class)
